

METALCOLD LTD.

**CONSERVING
THE FUTURE
BY RECYCLING
THE PAST**

METALCOLTD.

About

Metalco Ltd. has been in operation since 1988. It operates as an offshoot of Fenech & Cremona. Originally the firm was started by the late Anthony Cremona right after World War I where Antonio Cremona started recycling hides, glass and metals, which were exported to Italy.

At that time, the company's name was Malta Scrap Iron and Metal Company. In 1963, after Antonio Cremona's death, his widow Lorenza made her brother Joseph Fenech a partner in the firm and Fenech & Cremona was established. Today, we specialize in the recycle of ferrous and non-ferrous metal scrap such as copper, brass, lead and aluminium, and also in the shredding of various types of materials such as mattresses and confidential documents.

Metalco Ltd. is dedicated to being one of the leading producers and exporters of recycled scrap materials

by using the most effective, modern and innovative methods in scrap recovery and to establish and maintain a fully environmentally friendly waste management facility.

Success will ultimately be measured by our customers choosing us because of their belief in our ability to meet or exceed their expectations of price, service and delivery.

Our Services

Metalco Ltd. has expanded on its vast experience in the metal recovery and recycling sector and we are pleased to offer a number of services which are now available to our esteemed clientele.

Waste Management Services

Metalco Ltd. is a manufacturing organization whose major classification is the recycling of non-ferrous metals, paper shredding and cable stripping. As one of Malta's largest recyclers of scrap metal, we collect, process and recycle non-ferrous metals (such as aluminium, copper, stainless steel, nickel, brass, tin and others).

We make it easy and cost-effective for our suppliers of raw scrap to dispose of their materials in an environmentally responsible manner. We process our scrap metal by sorting, shearing, shredding and baling. Our facilities contain an array of processing equipment such as fixed and mobile shears, balers and loading equipment such as material handlers and conveyors. We transport processed scrap to customers in Europe and other countries primarily via ships. As part of our commitment to being a very efficient, low cost scrap

processor, we are constantly investing in improvements to our facilities to increase our capabilities and efficiency while reducing our environmental footprint.

We purchase a wide variety of non-ferrous and ferrous scrap metal. Our suppliers range from the common peddler to some of the largest producers of scrap metal in Malta. This said, we purchase almost any kind of scrap metal, particularly in large quantities.

If you are interested in
selling scrap metal to
Metalco Ltd. we will pay
CASH on delivery.

Aluminium & Aluminium Bales

Aluminium raw material is supplied in the form of: soda cans, bumper, pots, pans, foil window frames, printing sheets, air conditioners and crown corks. This product is normally sorted by hand. There are various types of aluminium such as: cast, profiles, zamac, lead, soft and cans.

Copper

Copper raw material reaches the organization in the form of: electrical wiring, copper piping, copper bus bars, solid transformers, starters, kettles. Varieties are between copper1, copper2, copper3 all are sorted by hand and placed in jumbo bags.

Brass

Brass is supplied in the form of auto radiators, ornamental brass, keys, locks, railings, gear bolts.

Bronze

Sorted by hand and placed in jumbo bags.

Stainless Steel

Baled (compressed) in form of chippings, it must also be sorted by hand.

Lead

This raw material is supplied in the form of auto batteries, soft lead, colars, lintho type and zinc. It is normally melted.

Cable Stripping

This arrives at our yard in the form of electrical cables, which are insulated copper and aluminium wires. There is also lead covered copper power cables. Machine based system which separates the cables into their component parts.

Lead Acid Batteries

Any kind of lead acid batteries from cars, trucks, boats etc.

Transportation & Disposal of Waste

Metalco Ltd. is committed to ensuring the highest level of service, which is why we offer to make the disposal of waste as easy and efficient as possible.

For this reason we offer pick up services whereby Metalco employees will come on site and skilfully handle most types of waste for transportation. In order to benefit from the transportation services it is advisable to contact Metalco Ltd. to set an appointment for the pickup of the waste.

Hazardous

Metalco Ltd. offers the service of handling and transportation of all types of hazardous wastes and substances. Our company is equipped with a certified vehicle fleet approved by the Local Environmental Authority (MEPA). The transportation of these substances are carried out accordingly and in-line with all legal obligations.

This service is provided as follows:

- Analysis of material.
- Transportation of the hazardous substances to our waste management facility.
- Full history of transport notification.
- Full history of documentation.
- Packaging of hazardous substances.

- Destruction and disposal of rubber pipes.

A close-up photograph of a small, rectangular piece of white paper with the word "SECRET" printed in bold, black, sans-serif capital letters. The paper is slightly tilted and lies on a chaotic pile of shredded white paper. The entire scene is bathed in a strong blue light, creating a high-contrast, monochromatic effect. The shredded paper in the background is out of focus, emphasizing the central "SECRET" tag.

SECRET

Portfolio

Over the years Metalco Ltd. has worked with various clients ranging from small businesses to large corporations all of which have always been more than satisfied with the level of service and consistency Metalco Ltd. always strives to provide.

Metalco has also embarked on several charity projects with local charities, in order to raise environmental awareness whilst at the same time helping those in need through monetary donations.

Puttinu Cares 2013

In 2013 Metalco Ltd. together with Metweee and a local charity Puttinu Cares launched an online campaign to collect old mobile phones. From the 5,000 mobiles collected, Metalco Ltd. managed to raise €2,000 which were all donated to Puttinu Cares.

Puttinu Cares 2014

In 2014 Metalco Ltd. once again partnered up with Metweee and Puttinu Cares by launching a campaign within schools across the Maltese Islands to promote and encourage the recycling of electronic waste. Metalco supplied special bins to the schools to allow students to recycle certain waste, after which it will be collected and processed by Metalco in order to raise a donation for Puttinu Cares.

DynCorp International

Demilitarising over 100 Metric tons of assorted brass cartridges and discs. All standards of demilitarization were met or exceeded. Crushing tons of cartridges and manually feeding millions of brass discs.

"As a UK based company recovering and recycling material on Malta presented us with some challenges but I am pleased to say that Metalco proved to be the perfect partner helping us with not only the recycling activity but also much of the logistics."

SALOMONE, SANSONE & CO.

Destruction of counterfeit goods in an environmentally friendly manner and according to EU regulations.

"Metalco provided a high-quality and timely service by setting up all the required machinery on-site and taking care of the full operation from the destruction of the contents to the disposal of the consignment from the site."

"Thanks for a job well done. During long hours and hot days assorted brass cartridges and discs."

MVTS Technologies

Recovering and recycling of WEEE in an environmentally friendly manner, this was including transportation, ensuring that the company keeps solid reputation it is known for.

"To-date I can safely say that the services provided by Metalco Limited have always been to my satisfaction."

Department of Civil Protection

Provided a high-quality and timely service by setting up all the required machinery on-site and taking care of the full operation from the destruction of the contents to the disposal of the consignment from the site.
